A quick check for your practice

Your dental inventory is costing you more than you think

1. How much do you lose each year to **expired, unused and overstocked** supplies?
2. How many **hours do you pay your team** to count, chase products and place orders?
3. How much **money is sitting on your shelves** that you don't know you have?
4. How often do you **reorder products you already own**?
5. What happens when your **inventory person quits**, takes vacation or calls out?
6. How much **production is at risk** when your team can't find what a procedure needs?
7. How often does a **lab case come back late**, after the patient is already booked?

Can you say, right now, what you have, what you need, what's expiring and what you're spending?

DTrackAll can, live, in one place.

See it with your own supplies

At your demo, you'll see:

- ☑ **Your exact on-hand stock, live on the dashboard, with no counting**
- ☑ **Prices for the products you buy, across 180 suppliers**
- ☑ **A lab case going from slip to seat**

Built for every dental specialty

General dentistry · Oral surgery · Orthodontics · Periodontics · Endodontics · Pediatric dentistry · Implant practices

Single offices, groups and DSOs

Inventory Sight

DTrackAll is a product of Inventory Sight, LLC.

Inventory Sight

presents DTrackAll

Inventory · Ordering · Lab cases

Stop counting. Order for less. Track every case.

The DTrackAll Consumption Pad records every item as it's used, so your dashboard always shows exactly what's on hand. Orders are priced across 180 suppliers, and every lab case is tracked from slip to seat.

- **Live on-hand, no counting**
- **Procurement across 180 suppliers**
- **Lab case workflow**

HIPAA compliant. For dental practices, groups and DSOs.

The same office, one afternoon back

What changes when your office switches to DTrackAll:

TODAY	WITH DTRACKALL
KNOWING WHAT'S ON HAND	
Hours of counting with a clipboard, a few times a year	**No counting: the dashboard shows exact on-hand, live**
RUNNING OUT	
Found out in the middle of a procedure	**An alert before you run low**
ORDERING	
From memory, from one supplier	**Built from what you used, priced across 180 suppliers**
EXPIRED STOCK	
Found at the back of the shelf	**Flagged by lot before it expires**
LAB CASES	
On paper; late before anyone notices	**The slip prints itself; an alert when a case runs late**

Built by a team with 50+ years of combined dental and medical experience.

How DTrackAll works

1 Tag

Each item gets a small RFID tag as it's shelved, with its product, lot and expiration date.

2 Consume

The **DTrackAll Consumption Pad** records each item as it's used, so the dashboard always shows exact on-hand. No counting. To reconcile, a full count with the handheld takes minutes.

3 Compare and order

DTrackAll checks what's on hand against your levels and builds the order. **Compare prices across 180 suppliers**, then approve in one click.

4 Track every lab case

A one-page lab slip that prints on its own. DTrackAll follows the case to the lab and back, and alerts your team if it runs late.

Easy to start, easy to use

- 15-minute ramp-up
- Training videos built in
- HIPAA compliant
- We install and support it

No lockers, no special cabinets

Works with the shelves and drawers you already have.

Everything in one system

Inventory and ordering

- **Live on-hand, no counting** — The Consumption Pad records each use
- **Reconcile in minutes** — A full count with the RFID handheld
- **Real-time low-stock alerts** — At the levels you set
- **Expiration tracking** — By lot, flagged before products expire
- **Procurement across 180 suppliers** — Compare prices, order in one click
- **Alternate product support** — Alternates count toward your stock
- **Item finder** — Follow the signal to any tagged item
- **Reports for one office or a DSO** — Usage, overstock and spend

Lab case workflow

- **One-page lab slip** — Prints automatically when saved
- **Due dates set for you** — From each lab's turnaround time
- **Reminders and late alerts** — Before a case misses the seat date
- **Lab case dashboard** — Every open case and its due dates
- **How-to guides built in** — Photos, MODJAW, Cerec and iTero
- **Set up for each office** — Per-office labs, doctors and rules
